## ン(SHC)型 Model De-cone(SHC)

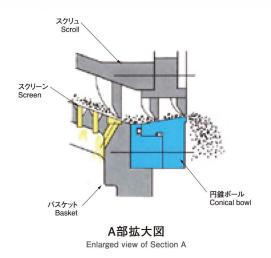

## 連続式

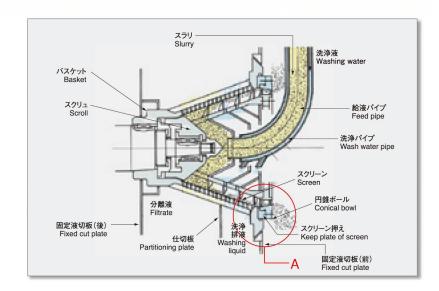

Continuous centrifugation model

ろ過式と沈降式遠心分離機の特長を巧みに組合せ 改良した機械で、高濃度にも対応して安定運転を行 い、ケーキ含水率の低下、ケーキ洗浄効果のアップ など今までにない適応性を持った機種です。

A remodeled model, which has properties of the filtering centrifugal separator and the settling centrifugal separator concomitantly in a sophisticated manner, operates stably at a high concentration. The model has achieved improvements that have not been realized before including low content of liquid containing cake and high cake cleaning effects.
